TIPS FOR STORING BREASTMILK EVERY OUNCE COUNTS

- Store breastmilk in quantities of 2-5 ounces in bottles or breastmilk storage bags, marked with the date.
- Thaw breastmilk in the refrigerator or by placing the container under warm water.
- Thawed breastmilk can be left on the countertop for 1-2 hours or the refrigerator for up to 24 hours.
- Never microwave or boil breastmilk.
- Do not refreeze breastmilk once it has been thawed.
